EDUCATION

University of California, Berkeley

Berkeley, CA

Master of Engineering in Electrical Engineering & Computer Science

Aug 2023 – May 2024

- **Specialization:** Data Science & Systems
- **Relevant Coursework:** Data Science, Computer Security, Operating Systems, Engineering Leadership

University of California, San Diego

San Diego, CA

Bachelor of Science in Computer Engineering; GPA: Overall 3.94/4.00, Major 4.00/4.00 Sep 2019 – Jun 2023

- **Relevant Coursework:** Data Structures & Algorithms, Computer Network, Computer Security, Recommender Systems, Parallel Programming, Computer Graphics, Competitive Coding, Digital Signal Processing

SKILLS

Languages & Frameworks: Java (*Spring Boot, JUnit, Java Agent, JVM Hotswap*), Javascript (*React, Relay, GraphQL, Next.js, Vue.js*), Go (*Fiber, sqlx*), SQL (*MySQL, PostgreSQL, ORM*), Swift (*SwiftUI, WidgetKit, Alamofire*)

Tools & Technologies: Docker, Git, GitHub Actions, IntelliJ, Linux (Ubuntu/Debian), Nginx, SSH, Xcode

WORK EXPERIENCE

IXL Learning

San Mateo, CA

Software Engineer Internship for Infrastructure

Jun 2023 – Present

- Created command line tools to analyze Maven (Java) and npm / yarn (JavaScript) dependency files, automating the detection of updates and vulnerabilities in each project and eliminating the need for manual repository checks.
- Developed full-stack web pages using Java Spring Boot, Next.js (React), and PostgreSQL on Docker environments, to allow users to swiftly approve newer versions and automatically update dependency files, reducing time spent and eliminating errors associated with manual editing of dependency files.
- Implemented a semantic versioning tagging system for dependency updates, enabling automatic skipping of major, minor, or patch versions, thereby streamlining the review process and reducing the workload on reviewers.

Meta (formerly Facebook)

Menlo Park, CA

Software Engineer Internship for Infrastructure

Jun 2022 – Sep 2022

- Developed full-stack web pages using React and PHP for a centralized platform that streamlined system health monitor management across multiple MariaDB (MySQL) databases, improving efficiency for internal teams.
- Implemented customizable predicate filters with ORM and GraphQL and optimized SQL queries and data fetching, resulting in an 80% increase in productivity for Ad and Instagram teams based on survey feedback.
- Conducted a tech talk to 700 employees, showcasing web page design and performance improvements.
- Proposed long-term unifying efforts for detectors to improve user experience, adopted as a 2023 team goal.

Computer Science & Engineering Department, UC San Diego

San Diego, CA

Head Instructional Assistant for Grading Infrastructure

Sep 2020 – Jun 2023

- Led the development of the automated grading system for Java and C++ courses, supervised by Prof. Paul Cao.
- Automated the grading process of students' JUnit testers with Java Agents and JVM Hotswap, and integrated the system with Google Sheets for non-code submissions, reducing manual grading time by 95%.
- Dockerized the system for scalability, accommodating a 200-student increase in class enrollment per quarter.
- Provided comprehensive training and documentation for new tutors, ensuring knowledge transfer and continuity.

AWARDS & ACHIEVEMENTS

SIM SD Scholarship: Society for Information Management recognition for exceptional teaching skills, among a select group of 12 students chosen from all schools in San Diego.

Apple WWDC Scholarship: Twice awarded by Apple in 2017 and 2018 for extraordinary skills and passion in iOS development, being one of only 300 students selected worldwide each year.
